Useful pipeline enquiry sites

www.linesearchbeforeUdig.co.uk or www.LSBUD.co.uk

for free, quick online search of proposed work location

www.linewatch.org.uk

for links to individual pipeline websites

Typical pipeline aerial markers

Essar aerial marker

Esso & MLP aerial marker

Wingas aerial marker

National Grid Gas

Each operator has similar aerial markers to left

Other warnings

IMPORTANT

Marker posts only denote the presence of our pipelines. Never presume that the pipeline runs in a straight line between marker posts as there could either be a bend or the posts may have been moved without our knowledge.

DO NOT PRESUME ANYTHING; TELEPHONE OUR AGENTS AND WE WILL SEND SOMEONE TO VERIFY EXACTLY WHERE THE PIPELINE IS SITUATED.

When the pipeline route has been located it will be marked with location pegs.

Post warning marker

Pole warning marker

Beware of posts with brass studs (such as the post above) which have cables connecting to the pipeline below.

CAUTION

THIS STRUCTURE IS IN CLOSE PROXIMITY TO A HIGH PRESSURE OIL PIPELINE. BEFORE COMMENCING ANY EXCAVATION WORK PLEASE CALL

FREEPHONE 0800 XXXXXX.

You may find signs such as these on apparatus close to the pipeline.

Sometimes metal studs are used in roads and pathways

Stile warning marker

New design marker post

STANDARD SYMBOLS ON MARKER POSTS

Standard symbols will include **operator** or **pipeline contact** or **emergency number**.

Other information is specific and holds details for the **emergency services**.

WARNING

PIPELINE OFFSET BEHIND MARKER

The markers may not always be directly over the pipeline. In which case an additional warning sticker will indicate the direction of off-set.
